

University websites

www.gov.uk/unimoney (has on all important finance facts + a student finance calculator)

<http://www.nhsbsa.nhs.uk> (all information on NHS bursaries)

www.scholarship-search.org.uk (information on bursaries and scholarships from the govt, from universities and from charities plus eligibility criteria and how to apply for them- would really recommend pushing this website as so much money goes unclaimed!)

www.unistats.direct.gov.uk (has a lot of information to help decide which university/college to go to including tuition fee, accommodation and living costs plus student satisfactions rates and information about what their graduates do when they leave university)

www.studentroom.co.uk (this is a forum with official threads from a lot of areas including Student Finance and Student Loans Company & is a great place to post questions).

www.nationalcareersservice.direct.gov.uk (has loads of information about apprenticeships, degree apprenticeships, part time jobs and full time jobs both before and after uni. Really helpful to think about career in case the job you want requires a specific degree!)
